# New Policy for Steel and Aluminum Wheel Repair

Currently Applies To: ALL Models

American Honda has recently issued a new policy regarding repair of steel and aluminum wheels. In a nutshell, here's what it says:

- American Honda doesn't approve of any repair of steel or aluminum wheels that involves welding, bending, hammering, heating, straightening, re-machining, reforming, or adding new material.
- Any repair of steel or aluminum wheels must be strictly limited to minor cosmetic sanding or polishing that removes just the finish.
- American Honda won't warrant any wheel other than an undamaged original or a new replacement part.
